

**FALSE RAPE ACCUSER'S MEDICAL RECORDS FROM 2004-2010 EXPOSING HER
FALSE CLAIMS OF SEXUAL ABUSE BY THE SPH**

DATE	MEDICAL RECORD DETAILS	PAGE	FALSE CLAIMS IN CHARGESHEET
16 th Feb 2004 to 15 th Aug 2012	The false rape accuser's complete medical records from 2004-2010 reveals that she has an incurable, highly contagious sexually transmitted disease (STD) known as genital herpes since 2004 or earlier. This STD is at least 40% more contagious than HIV (according to HIV Insite study by University of California, San Francisco) and gets transmitted just by skin to skin contact at the points of outbreak. It does not even need physical intercourse to be transmitted.	65	The false rape accuser claims in her chargesheet against The SPH filed with Karnataka CID in 2010 that he had sexually abused her 50 times (including unprotected physical intercourse & oral sex) from 2005-2009 . If this were true, The SPH should certainly be a carrier of this disease. The SPH's medical records from the potency test conducted by the State prove that a) HE DOES NOT HAVE & b) HE HAS NEVER HAD any STD.
19 th July 2005	Medical record reveals outbreak of severely contagious oral herpes, which has spread even to the face. Doctor warns her against touching her own face because the disease will spread to other parts of her face.	47	The false rape accuser claims falsely multiple incidents of rape and forced sexual intercourse and oral sex. But the doctor tells clearly even she touching her own face will spread the disease, then how can The SPH not have the STD after so many alleged incidents?
30 th Nov 2005	Medical records show that False rape accuser visited her doctor on this day in Michigan , USA for treatment after a genital herpes outbreak earlier that month	44	In the chargesheet, she alleges a forced oral sex incident with The SPH on the very same day (which is Dec 1st in India)at Salem in Tamil Nadu. Ashram records show that on that day, The SPH was conducting a full-day meditation program (NSP) in the presence of more than 200 people in his Bidadi ashram near Bangalore. SO THE FALSE RAPE ACCUSER WAS IN USA, THE SPH WAS IN BIDADI, BUT THE RAPE HAPPENED IN SALEM??! Complete & blatant false claim exposed here.

3 rd Aug 2006 4 th Aug 2006 5 th Aug 2006 8 th Aug 2006	Outbreak of genital herpes Lab report on 4 August 2006 indicates Varicella Zoster POSITIVE Lab report indicates Herpes POSITIVE Lab report indicates Herpes POSITIVE	42 56 56 41	In her chargesheet, The false rape accuser alleges that she was forced to drink alcohol and alleges intercourse in the Bidadi ashram
15 th Nov 2007	Outbreak of HSV type 2 in the genital region (Lab report on 17 November 2007 showing Herpes POSITIVE)	38-39	Reveals the continuity of the disease throughout the period when she claims to have been sexually abused by The SPH
22nd February 2009 to 3rd June 2009	Continuous monthly oral and genital herpes outbreaks	27	Chargesheet alleges that she was forced into sexual intercourse on May 13-24, 2009 in Los Angeles ashram. If this claim were true, The SPH should have contracted genital herpes – which he does not have as his medical records prove
Feb-June 2009	Reveals that The false rape accuser had highly contagious oral herpes for 5 months continuously from Feb-June 2009	33	Chargesheet alleges oral sex incidents between January & March 2009 in Namakkal & Rajapalayam in Tamil Nadu Had this been true, the chances of The SPH contracting this disease over several exposures as alleged, is almost 100%
25 th March 2009	Medical records show that The false rape accuser has bleeding wounds due to herpes gladiatorum, highly contagious variation of HSV-1 transmitted by direct contact with skin lesions	36	Under such conditions, even a physical contact (like kissing) between The SPH and the false rape accuser would have been sufficient to transmit this disease to The SPH
15 th April 2009	Medical record indicates oral herpes since 22nd February 2009 as recorded by The false rape accuser herself	33	Further confirmation that oral sex or even oral contact would have transmitted the disease to The SPH
3rd June 2010	False rape accuser admits to her doctor that she had a 'new partner' for one year since 2009, had oral sex and vaginal intercourse with this person who was HIV positive	23	The false rape accuser's chargesheet alleges that Swami The SPH had sexually abused her from 2005 onwards. So even by her own claim, he is not her 'new partner'. This proves that The false rape accuser was having

3rd June 2010	<i>The false rape accuser undergoes HIV test and consents to HIV counseling</i>	58	<i>voluntary sexual relationship with multiple partners . In all her public interviews, The false rape accuser repeats that she is a traditional married Indian woman with no other relationships and Swami The SPH had 'mesmerized' and 'abused' her. Why is she hiding her illicit relationships & pretending to be a moral woman?</i>

Top 10 False Claims exposed - RECAP

False Accusations of rape by False rape accuser, carrier of 3 STDs

- 1. False rape accuser has been the carrier of 3 STDs – oral herpes, genital herpes and herpes gladiatorum – since at least 2004.**

She has outbreaks of genital herpes every month.

She has outbreaks of oral herpes for as long as 5 months at a stretch.

She claims over 50 incidents of rape for 5 years by The SPH, when his medical records prove that he **DOES NOT HAVE and NEVER HAD any STD**

The SPH does not have any Sexually Transmitted Disease (STD). False rape accuser's husband not have STD, as per 12th May 2009 (page 30) medical records. Then from whom did False rape accuser get the STD herpes?

- 2. Did False rape accuser get the STD herpes in 2004...or has it since 1996?**

- Medical history investigated from 2004 onwards show the usage of suppressive medication for HSV 1, HSV 2 – Valtrex, Valacyclovir tablets and Zovirax ointment (Pages 68, 69 of medical record)
- Also False rape accuser's medical record of **3rd August 2006** states that she had possible symptoms of genital herpes over the last 10 years, according to the patient's own statement.

- 3. The false rape accuser claims to be a traditional woman from an orthodox family who was brainwashed and sexually abused**, but her

medical records indicate that she has had an illicit voluntary sexual relationship with at least one other individual who was HIV-positive.

Moreover, she has 3 STDs plus suspected HIV. It is very rare that any one man will carry all 4 diseases. Since it has been proved that The SPH did not have any physical relationship with her, it appears that she had a relationship with at least 4 other men who had these diseases, apart from other healthy men whom she may have infected.

4. **False rape accuser confesses to having an HIV positive ‘new partner’ in 2009** The false rape accuser’s medical record shows that she had an illicit sexual relationship with an HIV positive partner in 2009, while she claimed to have no illicit relationships except with The SPH for over 5 years

Who is this ‘new partner’ in 2009 with whom False rape accuser admitted to oral sex and vaginal intercourse?

It is possible that the person is Lenin Karuppan, the other conspirator in the The SPH case, as False rape accuser is now known to be having a physical relationship with Lenin Karuppan in 2009.

An individual by name Kandaswami has filed a complaint before Tamil Nadu CB-CID on 23rd August 2011 stating that he had witnessed the two parties in a physical relationship in a godown in early 2009.

5. As False rape accuser claims multiple incidents with The SPH right from 2005, **how did she not tell her doctor about any of the alleged incidents even once when she shares extremely private conversations** about her ‘new partner’ and suspected HIV positive? She even visits the doctor for skin rash – but does not tell her about a five-year period of sexual abuse?
6. **The false rape accuser claims that The SPH forced her to abort her baby.** Medical studies show that a woman with herpes has a **high chance of passing on the virus to her unborn child**, resulting in the birth of a diseased or infected child. This is most likely to be the reason why The false rape accuser chose to abort her child. Another possible reason is that **The false rape accuser did not know who is the father of her child**, due to her multiple illicit relationships. Her medical records show that she was using contraception in her relationship with her husband, and **had no plans for pregnancy in 2005-2006** (page 49 of medical records)
7. **False rape accuser claimed to be a victim of rape – was there a medical test done to prove this?**

The very first test to be done with a rape victim is a medical test to prove or disprove the rape claim. Why was this test not done on The false rape accuser? Only a very basic medical diagnosis was performed on her, which only ascertained whether she is a woman or not!

Moreover, a complete medical examination of False rape accuser would have revealed at the outset that she is carrying 3 contagious STDs.

8. What should have been done before accusing The SPH of rape?

- i. Finding material evidence of rape on The false rape accuser through medical examination
- ii. Testing whether The SPH is capable of performing the sexual act
- iii. Testing The SPH for STD after ascertaining that The false rape accuser has 3 contagious STDs

9. **False rape accuser falsely claims forced oral sex in Salem** in Tamil Nadu on December 1, 2005. Her medical records show clearly she was in USA at the time. The SPH's video records clearly prove he was conducting the NSP program in Bidadi ashram, India on that date.

10. False rape accuser claims to be (a) a victim of sexual abuse, (b) a champion of women's rights and (c) standing for the social cause of exposing a sex offender. Even a casual examination of the contradictions in her medical record and her chargesheet prove all three claims to be completely and shamelessly false.

a) **The false rape accuser was never a victim, as her medical records expose. Rather, she is a CRIMINAL** who has foisted a false claim on The SPH to extort money, defame him personally and destroy his mission.

To achieve this end, she has deliberately cheated both - individuals who trusted her, and agencies of law.

She cheated her husband by having illicit relationships, she cheated her parents by lying to them, she cheated her unborn child by killing it, she cheated her multiple sexual partners by sleeping with them when she has a contagious disease, she cheated millions of The SPH's devotees by falsely attacking him, poisoning their ears and turning them away from the spiritual path, she cheated the CID by giving a false statement on which they acted, she cheated the court by giving a false complaint against The SPH, she cheated the media by telling her fake story which they believed and publicized, and above all she is still cheating the public by appearing in the media with the fake story and crocodile tears.

b) **The false rape accuser has committed an unforgivable offence against all women.** Being a much publicized case, the false rape accuser's false rape charge on The SPH can be quoted as a precedent in future rape cases as well. In the future,

even genuine victims of rape or sexual abuse will be suspected of making false rape claims. The false rape accuser is not only a disgrace to Indian womanhood, but the instrument for the possible denial of justice to thousands of women in the future.

c) With The false rape accuser's criminal plans exposed, her claims of standing for a social cause fall flat on their face. Far from being a social activist, she is an **anti-social element** hijacking agencies of law and social organizations for her private vested interests.
